The screenshot shows the Visual Studio Code editor with the file 'acordeon.html' open. The Explorer sidebar on the left shows the project structure: 'COMPLEMENTARIO10DAW' containing 'img', 'acordeon.html', 'acordeon.js', and 'styles.css'. The main editor area displays the HTML code for 'acordeon.html'. The code includes a DOCTYPE declaration, HTML and charset tags, a viewport meta tag, a title 'Acordeón de Fotos', and links to jQuery, fullPage.js, and the project's styles.css. The body contains a 'fullpage' container with four sections, each featuring an image (img/ajax.jpeg, img/homero.jpeg, img/pante.jpeg, img/molly.jpeg) with specific classes and data-index attributes. At the bottom, it includes links to fullPage.js and the project's acordeon.js.

```

The screenshot shows the Visual Studio Code editor with the file 'acordeon.js' open. The Explorer sidebar on the left shows the project structure: 'COMPLEMENTARIO10DAW' containing 'img', 'acordeon.html', 'acordeon.js', and 'styles.css'. The main editor area displays the JavaScript code for 'acordeon.js'. The code uses jQuery to initialize the fullPage.js plugin on the '#fullpage' container, setting anchors to 'imagen1', 'imagen2', and 'imagen3', and a menu to '#menu'. It also sets scrollingSpeed to 1000, horizontalScrolling to true, slidesNavigation to true, controlArrows to false, and loopHorizontal to false. A click event is attached to the '.acordeon-img' elements, which calls the fullPage.js 'moveTo' method to navigate to the next slide (index + 1).

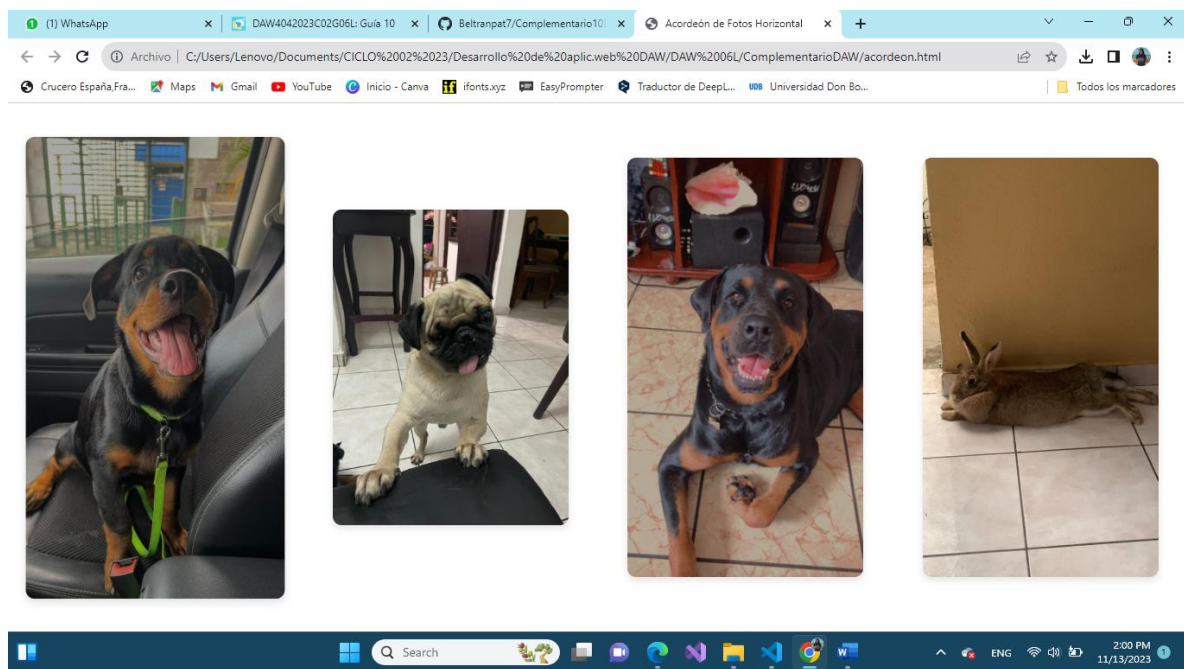

```
1 $(document).ready(function() {
2   $('#fullpage').fullpage({
3     anchors: ['imagen1', 'imagen2', 'imagen3'],
4     menu: '#menu',
5     scrollingSpeed: 1000,
6     horizontalScrolling: true,
7     slidesNavigation: true,
8     controlArrows: false,
9     loopHorizontal: false
10  });
11
12
13  $('.acordeon-img').on('click', function() {
14    const index = $(this).data('index');
15    $.fn.fullpage.moveTo(index + 1);
16  });
17
